

Lab 8: To demonstrate the concept of exception handling

- (1) Write a Python program to use try-except-else block
- (2) Write a Python program to use try-except-finally block
- (3) Write a Python program to write your own exception and throw it.
- (4) Write a Python program to demonstrate the use of built in modules random and math.
- (5) Write a program to create a module and to use its functionality.
